

PROYECTO 3: Cartera personal (Personal Portfolio) - Convierta el sitio web HTML simple anterior en una cartera personal.

El objetivo de este proyecto es enseñarle a estilizar un sitio web utilizando CSS. Tomarás la estructura del anterior proyecto 2 solo HTML y aplicarás varias técnicas de CSS para mejorar su apariencia y capacidad de respuesta.

En este proyecto, serás de estilo de la estructura del sitio web HTML que hayas creado anteriormente en un proyecto diferente. El enfoque estará en aprender a utilizar CSS para crear diseños sensibles, aplicar color y tipografía, y mejorar el diseño general de su sitio web.

A continuación, se dan mockups de la estructura del sitio web para dispositivos móviles y de escritorio. No se preocupe por los detalles de diseño, es decir, los fondos de colores, etc en esta etapa; no estamos buscando un diseño hermoso, sino un sitio web bien estructurado y sensible. Sólo concéntrate en hacer el diseño igual que la maqueta y asegurarte de que se vea bien en diferentes tamaños de pantalla.

Education

Graduated with 3.76 out of 4 CGPA. Won Acme Hackathon. Organized 30 sessions.

Courses I took:

- Object Oriented Programming

- Data Structures and Algorithms

- Web Engineering

- Artificial Intelligence

- Human Computer Interaction

- Computer Graphics

- Database Management Systems

- Distributed Database Systems

- Discreet Mathematics

Reviews from my Teachers

John doe was a brilliant student; always stood out with his assignments.

Submission Requirements

Your submission should include:

- A fully styled, responsive website with the same structure as the previous project.
- Consistent use of a chosen color scheme and typography.
- Proper use of CSS techniques like Flexbox, media queries, and the box model.
- A responsive navigation bar and well-styled contact form.
- Use Google Fonts to enhance the typography of your website.
- Look into GitHub Pages or Cloudflare Pages to host your website for free.
- Add support for dark mode using CSS variables.

After completing this project, you will have a solid understanding of how to style a basic HTML website using CSS. You can move on to more advanced topics, such as CSS animations, transitions, and grid layouts, in future projects.
